## XLD - Lined Butterfly Valve Series

**CRANE**

ChemPharma Flow Solutions

[www.cranechempharma.com](http://www.cranechempharma.com)

**PERFORMANCE** We listened to our most demanding critics:  
Our customers. Here's our response.

**ANSI Class 150/PN10 valve design!**

• **Lower torque ratings**

enable the use of smaller, less expensive actuators

• **The seal to atmosphere**

is assured by using the triple FKM O-rings around the base of the shaft

• **A wide sealing face**

prevents leakage at the flange

• **Improved disc design**

assures better stability

• **Temperature Range**

0° to 400° F  
233 K to 453 K  
-20°C to 200°C

• **Pressure Range**

Suitable for vacuum service  
(0.02 psi/1,33 hPa)  
Shut-off Pressure max. 150 psi/10 bar

• **Direct mount actuation**

ensures robust performance while providing compact system design. The large standard mounting pad conforms to ISO 5211.

• **Both the body and the shaft lining**

continue past the FKM-ring stem sealing components. The shaft and the seal components are protected from the flow media .

• **Better atmospheric corrosion resistance**

through high-end surface coating.

**SAFETY** You benefit... when experience meets design

**Belleville disc springs**

provide live loading to ensure a tight top seal.

**The revolutionary PTFE atmosphere seal** protects the top seal components and the shaft from atmospheric corrosion.

**Triple FKM-ring backup-seals**

provide a second, third and fourth line of protection against atmospheric leakage.

**Blow-out proof design**

Stem and disc are one simple part combined with the anti-blow-out system. (API 609 compliant.)

**The extended body lining**

assures optimum protection of the FKM-rings from corrosive media. These components are located behind the body liner extension. They are isolated from the media.

**The in-line resilient seal assembly**

assures optimum pressure distribution of the body liner to the disc assembly, providing tight sealing under all operating conditions. The wider seal-band provides a broader sealing area.

**Product naming**

XLD Series	Body	Flange
XLD11	WAFER	ANSI
XLD12		DIN
XLD13		JIS
XLD21	LUG	ANSI
XLD22		DIN
XLD23		JIS

**Fully lined bottom shaft**

assures optimum corrosion resistance and eliminates a potential leakage path.
